### DETAILED ACTION

Preliminary Amendment of September 10, 2003 cancels claims 1-16. Method claims 17-20 are currently pending.

#### *Drawings*

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "extractor" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

#### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 17 and 19-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Van Zeeland (6,023,213).

Van Zeeland teaches a method for setting the operating characteristics of a multi-position switch wherein a plurality of switch positions are each defined by a pair of magnets (see figs. 5-7) comprising:

an extractor 134 (fig. 7) for extracting magnets 120 (col. 2, line 10);

Art Unit: 2832

magnetically bonding the extractor to the magnet (see fig. 7) and removing the bonded magnet from the switch assembly 10; and

inserting a magnet having selective polarity orientation into the assembly (see figs. 5 and 6 for altering magnetic polarity).

Regarding claim 20, please see fig. 7 of Van Zeeland.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Van Zeeland '213.

Van Zeeland '213 teaches the claimed invention except for the magnet having a cylindrical shape.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have used a cylindrically shaped magnet for its equivalent in the art. The selection of any of shapes disclosed as equivalent magnet would be within the level of ordinary skill in the art.
